### **My Hypothesis**

**In the word bank below, there are four different items that plants tend to get energy from in order to grow. On the spaces provided down below, predict which one you think provides the most energy for plants on the left (Most Energy) and the least on the right (Least Energy).**

**Also, give a reason why you ordered the items the way you did.**

Sun	Air	Water	Soil
-----	-----	-------	------

**Most Energy**

**Least Energy**
